

## Would you like to have an Artech Camp in your community?

We can bring our popular Video Game Design and Animation Camps right to your community centre, school, CAP site or other meeting center! Programs are suitable for campers ages 8-14.

### This is what you will need to provide:

- A suitable location for computer and art activities.
- Computers\* or computer lab. For Video Game Design we recommend one computer per camper. For animation programs campers can work in groups ranging in size from two to four campers. Each group will require a computer.
- Supervision for recreation and lunch breaks.
- Eager Campers!

\*Need Computers? We are here to help. We may be able to arrange computers for your group!

*"Andrew told me that when he grows up, he wants to be the Prime Minister of Canada so that he can cancel school and send all of the kids to Artech camps all year round! I hope you can handle that!"*

- Susan MacPhee (Andrew's mom)

### This is what we supply:

- Team of two Instructors – this will accommodate a group of campers, maximum 18 participants
- A dynamic camp specialty program from 9-12 AM and 1-3 PM. *We are flexible and can certainly adjust our schedule to fit yours.*
- Choice of any of our Video Game Design or Animation Camps. See accompanying list of programs. Detailed descriptions are on our website. Note: we can also consider bringing a custom program to fit with your camp's theme, focus or interests.

## Pricing
